

APPLIED AI ENGINEERING / BENGALURU

Intelligence that *moves*. Engineering that *ships*.

Company Profile, 2026

WHO WE ARE

We build AI that *moves* metrics and *grows* revenue.

We are an AI engineering studio based in Bengaluru, India. Our focus is on building production-grade AI systems that deliver measurable outcomes, from autonomous agent pipelines to full-stack platform engineering.

We are engineers first. We don't write bloat. We build focused products that solve real problems, with AI built directly into the foundation.

04

INDUSTRIES SERVED

04

FEATURED PROJECTS

02

PRODUCTS IN R&D

WHAT WE DO

Everything we can do for you.

Software, AI, mobile & SaaS: every capability under one roof.

01

Custom Software

Web apps built for scale & speed, clean architecture, API & third-party integrations.

02

AI Agents & Automation

Autonomous workflow agents, LLM pipeline orchestration, RAG systems & data pipelines.

03

Mobile Applications

Native iOS & Android apps with smooth, production-grade UX.

04

SaaS Product Engineering

End-to-end product development: scope, UX, and production launch.

05

SEO & Search Visibility

Technical SEO audits, keyword-driven IA, and structured data for rich results.

06

Progressive Web Apps

Installable, offline-first apps: app-like UX, no app store required.

Industries we build for.

Healthcare

Digital experiences that connect patients with specialist care, from hospital platforms to clinical automation.

Hospitality & Travel

Websites and booking flows built for hotels, restaurants, and travel businesses that live on guest trust.

Real Estate & Construction

Credible digital storefronts that turn decades of construction expertise into qualified enquiries.

AI & SaaS

In-house and client products at the frontier of applied AI: gateways, agents, and platforms.

FEATURED WORK

What we've shipped & built.

01

CUSTOM WEBSITE

RVR Healthcare

A multi-location super-speciality hospital website connecting patients to 15 specialists across 9 departments.

02

MARKETING WEBSITE

Aashi Constructions

A modern marketing website for a Bengaluru construction firm with 25+ years of residential and commercial expertise.

03

MARKETING WEBSITE

Hotel Amaravathi

A boutique hotel website with room showcases and one-tap WhatsApp booking flows.

04

MOBILE APP UI/UX

AstroAlok

A 30+ screen UI/UX design for an astrology consultation app: onboarding, discovery, booking, chat, and video & voice consultations.

PRODUCTS IN DEVELOPMENT

Building our own products too.

Axora: AI Gateway

• LIVE

The open-source AI gateway that runs on your own servers: one endpoint, five providers, automatic failover, zero lock-in.

- ✓ Multi-provider routing across Groq, OpenRouter, Gemini, OpenAI & Claude with automatic failover
- ✓ Real-time SSE streaming, token-by-token, across every connected provider
- ✓ Polished ChatGPT-style chat interface with model switching & conversation history

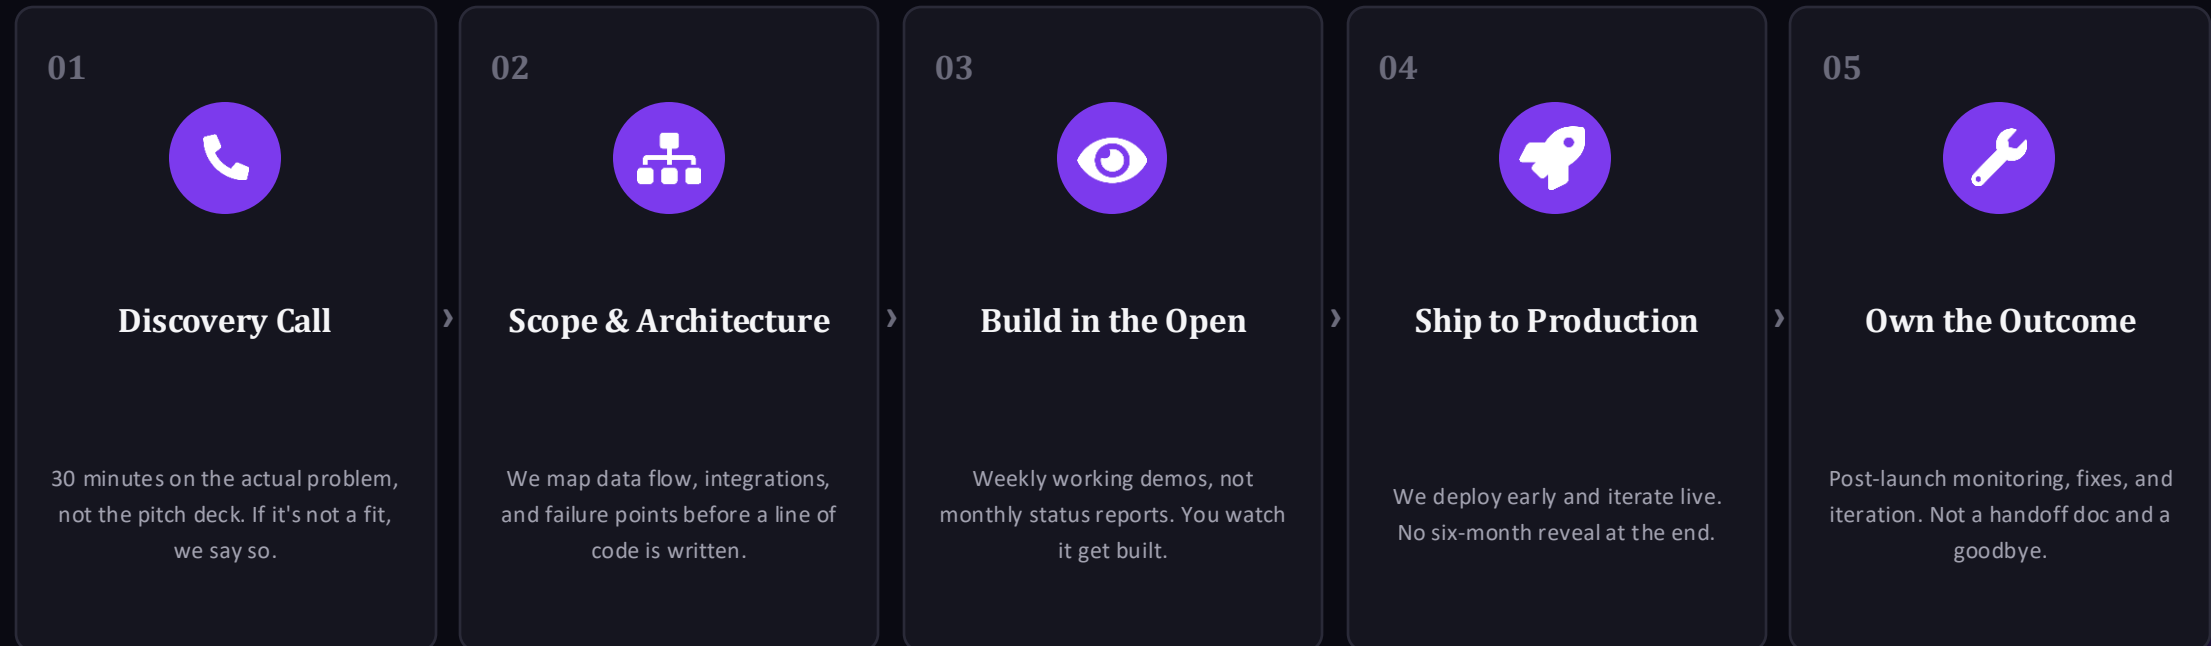

HMS: AI-Enabled Hospital Management System

IN DEVELOPMENT

A white-label hospital management system covering patient care, appointments, AI-transcribed clinical notes, pharmacy, billing, HR, lab, and analytics, deployable for any hospital with zero code changes.

Five steps. No detours.

The same process for a two-week integration and a six-month build.

The Aivorylabs way.

Engineering Depth

Production-grade systems with clean architecture, tested thoroughly, and built to scale beyond the demo.

Craft Over Trends

We ship what works. Practical decisions over hype, maintainable code over flashy prototypes.

Total Ownership

From first call to production and beyond: we own outcomes, not just deliverables.

“We build focused products that solve real problems, with AI built directly into the foundation. No bloat. No shortcuts.”

Why teams work with us.

Direct Access to Engineers

No account-manager layers: you talk to the people building your product.

Production-Grade by Default

Systems tested thoroughly and built to scale past the demo, not just to launch.

Full-Spectrum Capability

Software, AI, mobile and SaaS under one roof: one partner for the whole build.

AI Built Into the Foundation

Not bolted on afterward: intelligence is part of the architecture from day one.

Practical Over Hype-Driven

Maintainable decisions over trend-chasing, so what we ship keeps working.

Let's create something *powerful*.

Ambitious project at the intersection of AI and software engineering? Reach out and let's build it, from first call to production and beyond.
